ACKNOWLEDGEMENTS

The stakeholders would like to thank the many health care professionals who take the time to complete these forms. Your participation is invaluable in helping maintain accurate and reliable information on live births within our province.

The financial support made available through Statistics Canada by providing form designers, and the printing of the form is appreciated and acknowledged.

The cooperation of all the participating agencies and members of the Live Birth/Mortality System Advisory Committee is gratefully acknowledged. Without their input and continued support, the ability to maintain relevant and accurate data would not be possible.
CHANGES/REVISIONS FOR 2017 LIVE BIRTH NOTIFICATION (LBN) FORM

The guide on how to complete each field is located on pages 8-17.

There have been minor formatting changes to the 2017 form, and there were no changes to specific fields.

Information you should know before completing the 2017 LBN form:

The recently revised Live Birth Notification form (January 2017) will replace the form currently in use (2016). Please destroy all remaining copies of the 2016 LBN form on January 1, 2017. If you have not received your 2017 LBN forms by then, please notify this office immediately.

Additional copies of this manual can be downloaded from www.nlchi.nl.ca

Any 2017 births not recorded on 2017 forms may be returned for the completion on the correct form.

*It is recommended that you review the 2017 LBN as well as the Guide for Completion before commencing use of the new form.
SPECIAL NOTICE

The Reference Manual guide has been updated. It is recommended that you review pages 8-17 for guidance on how to complete each field of the 2017 Live Birth Notification form.

The Live Birth Notification form must be completed within 48 hours of delivery and submitted within five days of delivery to:

Vital Statistics Division
Service Newfoundland and Labrador
P.O. Box 8700
St. John’s, NL Canada A1B 4J6
T (709) 729-3308

Please specify CONFIDENTIAL on all envelopes.

All comments and questions concerning the Live Birth Notification form and the LBN Reference Manual are welcome and can be directed to the Centre at (709) 752-6014 or by completing and forwarding the Comment form in the back of the Guide.

Manager, Clinical Standards and Information
Health Analytics and Evaluation Services
Newfoundland and Labrador Centre for Health Information
70 O’Leary Avenue
St. John’s, NL A1B 2C7
T (709) 752-6014
INTRODUCTION

In 1981, a Physicians Notification of Birth was introduced to improve the timeliness and accuracy of health statistics regarding live births in our province. In 1986, the Division of Health Research and Statistics, with the assistance of a multidisciplinary committee, revised the Notification of Birth Form and introduced it into the hospital system.

Since 1986, there have been several revisions, and in 2002, the Live Birth Notification form underwent major revisions to accommodate the ever changing need to capture new data and eliminate the capturing of data that is no longer relevant. Since 2002, the Live Birth Notification form is reviewed annually to consider end user requests and to ensure the data collect is relevant.

This notification of birth provides information to the Department of Health & Community Services, Service NL - Vital Statistics Division, Regional Health Authority Health & Community Services, Statistics Canada, Newfoundland Statistics Agency, and the Newfoundland and Labrador Centre for Health Information (the Centre). It also serves as a referral notification for the Healthy Beginnings Program as well as a working document for Regional Health Authority Health & Community Services.

This revised form had the input of many stakeholders. The provincial committee – the Live Birth/Mortality System (LB/MS) Advisory Committee has the following representatives:

- Registrar, Vital Statistics Division, ServiceNL
- Newfoundland and Labrador Funeral Services Association
- Program Coordinator, Perinatal Program Newfoundland and Labrador (PPNL)
- Clinical Educator, Child/Women’s Health Program, Janeway Children’s Health and Rehabilitation Centre
- Department of Health and Community Services
- Newfoundland and Labrador Centre for Health Information
The Live Birth Notification form is a multi-part document (Parts A & B).

**PART A:**
- Registration
- Infant
- Mother
- Other Parent
- Health History and Medical Certification of Birth

**PART B:**
- Referral to Health and Community Services
- Hospital Nursing Discharge Summary
- Healthy Beginnings Follow-Up
- Referral Priority Assessment for Follow-Up

Information on Part A is used by:
- Vital Statistics to ensure all births are registered, to verify births registered by parent(s), and issue birth certificates.
- The Centre to classify each birth according to ICD-10-CA coding guidelines and to support the NLCHI Live Birth Database, which contains information concerning the number of births, types of births, and related information.
- Statistics Canada to gather data to meet the requirements of the Federal Government.
- Researchers and government departments & agencies (e.g. PPNL) use the information gathered on the Live Birth Notification form.

Parts A & B are used by Health & Community Services to obtain pertinent medical information on the mother and infant for follow up purposes; therefore, it is important that all the questions be answered. It is also used as a referral to the Healthy Beginnings Program.

The referral to Health & Community Services **must** contain both parts A & B.

The Newfoundland and Labrador Centre for Health Information will continue to support education/training through provision of materials and consultation.

**Regional Health Authorities have permission from the Newfoundland and Labrador Center for Health Information to reproduce this entire guide or any section of this guide.** Copies can be downloaded from [www.nlchi.nl.ca](http://www.nlchi.nl.ca), under STANDARDS > CLINICAL STANDARDS AND INFORMATION (CSI), at the following link:

DEFINITIONS

For the purpose of data collection for the Live Birth Notification System; the following definitions apply:

**Birth:** The birth of one infant.

**Delivery:** The birth of one or more infants in the same event. e.g. Twin would be one delivery.

**Live Birth:** The complete expulsion or extraction from the mother, irrespective of the duration of the pregnancy, of a fetus in which, after the expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta attached.

**Multiple Birth:** A delivery that results in more than one birth, whether live born or stillborn.

**Stillbirth:** The complete expulsion or extraction from the mother of a fetus of at least 500 grams or more in weight or at least 20 weeks gestation in which, after the expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscle.

**Total Births:** The combined total of live births plus stillbirths.

The live birth and stillbirth definitions are the legal definitions as outlined by the Service NL - Vital Statistics Division.

These definitions have been adapted from Statistics Canada.
GUIDELINES FOR COMPLETION OF LIVE BIRTH NOTIFICATION FORM

Parents have the right to refuse to answer any or all questions on the LBN form. If the parents refuse to have the form completed, they should be advised that obtaining a birth certificate and/or a MCP number for their infant may be difficult and/or prolonged. If the parents refused to have the Live Birth Notification form completed, this should be noted on the mother’s health record.

The Live Birth Notification form is printed on carbonless copy paper, and therefore it is recommended that a ball point pen be used to complete this form. You will be making multiple copies and are asked to please press firmly so that the information is reflected on the multiple copies. Please ensure ALL fields are completed. It is also important that forms are not placed on top of each other when completing, as the information from one form may copy through to the next, making it illegible, and/or provide conflicting information.

Each health care facility is responsible for ensuring that both Part A & Part B of the form is completed by the appropriate staff and sent to the appropriate agencies. Facilities are directed to staple both the white and green copy together before forwarding to Vital Statistics to ensure forms are not separated. Each copy is labeled indicating where it should be sent:

White -- Vital Statistics
Green -- Vital Statistics
Goldenrod -- Hospital Health Record
Pink -- Health & Community Services

Shaded blocks on the form (Hospital Code, ICD-10/CCI Codes, etc.) are for Vital Statistics and/or the Centre use only.

Part B is to be completed upon discharge of the mother and/or infant and sent to the appropriate Health & Community Services Board along with Part A. If a mother or infant is not discharged on the same date, a referral (Part B) for each will be required upon discharge.

This Reference Manual is divided into sections identical to those on the Live Birth Notification form. It begins with Part A, questions 1 to 52 and continues through to Part B, questions 57 to 78.
THE FOLLOWING ARE VALID INDICATORS:

When completing the Live Birth Notification form, please do not leave any question blank. If the information is non-applicable or unknown, use the indicators below.

<table>
<thead>
<tr>
<th>VALID INDICATORS</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td>Meaning Non-Applicable</td>
</tr>
<tr>
<td>U/K</td>
<td>To be used <strong>ONLY</strong> when the information is not found on the patient chart, is unavailable, or is truly unknown.</td>
</tr>
<tr>
<td></td>
<td><strong>ALL</strong> questions from Part A (LBN) and Part B (Referral to Health &amp; Community Services), except for the shaded areas (office use) should be completed. Questions beyond #79 on Part B are for Health &amp; Community Services use.</td>
</tr>
</tbody>
</table>

Surname of Infant
An infant may be given the surname of the mother, the father/other parent, hyphenated combination of both, or any surname chosen by the parents.

Vital Statistics requires a Birth Registration form be completed by the parent(s). It is the responsibility of the parent(s) to complete and return this form to Vital Statistics.

Health care facilities will provide birth registration packages to birth mothers. The birth registration packages are also available at Vital Statistics.

Vital Statistics Division
Service Newfoundland and Labrador
P.O. Box 8700
St. John’s, NL Canada A1B 4J6
T (709) 729-3308
For The Information of the Parents – Please Note: When applying for a MCP number for the infant, if the applicant does not have the same surname as the infant, MCP will require a birth certificate of the infant. Birth Certificates are available through Vital Statistics. There is a $20.00 cost for each birth certificate.

Infant’s Surname While in Hospital
To ensure safety and continuity of care while the infant is in hospital, it is recommended that the surname given to an infant on delivery remain the same for the length of stay in hospital.

Information on Other Parent
Information regarding the other parent is desired, however, if the other parent is not identified, use the appropriate valid indicator. Draw a diagonal line through the section and enter U/K. This does not indicate that the other parent is unknown; rather it indicates that the information about the other parent is unknown, or has not been provided.

Live Birth Notification – Part B: Referral to Health & Community Services
If parents refuse to have the LBN Referral sent to Health & Community Services and leave the hospital because they do not wish follow-up, the parents’ request is to be respected. The refusal of referral by the parents should be noted on the mother’s health record.

The Hospital Nursing Discharge Summary provides for early follow-up of the infant and mother with Health and Community Services. Prompt transmittal of completed forms allows continuity of care for infants and families.

If immediate follow-up is required (within 48 hours), the referring nurse is requested to telephone the referral to a Health & Community Services Nurse (follow up with the form). This requirement may vary depending upon the regional policy; therefore, check your local policy to ensure the correct procedure is followed.
Inform the Parents
Before asking the parents for the information required on this form, you can use the following explanation to help minimize questions about who is using this information.

The information on the Live Birth Notification form is required by several government agencies:
- Vital Statistics to register the birth of the infant and issue birth certificates. Information is also shared with the Centre, for input into the provincial database.
- Statistics Canada, for input into the national database.
- A copy is sent to Health & Community Services as a referral to the Healthy Beginnings Program.

SPECIAL REFERRAL INSTRUCTIONS:

If immediate follow-up is required (within 48 hours), the referring nurse is requested to telephone the request to the Community Health nurse.

- If infant remains in hospital following discharge of mother:
  Complete and process Part B for mother
  Forward second referral (Part B) at the time of infant’s discharge, with information on infant’s hospitalization and recommendations for follow-up.

- If mother remains in hospital following discharge of infant:
  Complete and process Part B for infant
  Forward second referral (Part B) at the time of mother’s discharge, with information on mother’s hospitalization and recommendations for follow-up.

- If infant is transferred:
  Include on mother’s referral (Part B) as much information as possible regarding infant’s condition.

- If following discharge, the mother stays for more than one week in a Community Health nursing district other than her place of residence, send the Health & Community Services Nursing Referral to the district where the mother is staying immediately following discharge. Also, Part B has an area entitled “Alternate Address”; complete this section when the mother is not returning to her usual place of residence within a week after discharge.

Ensure all sections of the Live Birth Notification form are legible prior to sending.

HEALTH HISTORY AND MEDICAL CERTIFICATION OF BIRTH

This section contains information on both mother and baby and is completed after delivery. For questions that have multiple check boxes, please check all that apply. If the answer is unknown, or not applicable, record the appropriate indicator (U/K or N/A).

PLEASE NOTE: It is recommended that the attending physician (in some facilities this may be the on-call physician or other primary health care provider) complete the following questions: 32, 37, 38, 44, 45, 46, 47, 48 & 49.

For referral instructions to the Provincial Perinatal Program see Appendix A.

</table>
| # 44  | Maternal Risk Factors | Check (V), as applicable, any maternal risk factors **during this pregnancy**. If Other is selected specify appropriate information. **All of these maternal risk factors should be verified by documentation on the chart or prenatal record.**  

The following definitions have been determined with input from medical personnel.  
- Anemia (< 100 G/L): if recorded anytime during this pregnancy prior to delivery.  
- Pre-existing Diabetes: confirmed diagnosis of insulin dependent diabetes prior to this pregnancy.  
- Gestational Diabetes: medically confirmed diagnosis of gestational diabetes during this pregnancy.  
- Antepartum Hemorrhage: any vaginal bleeding after 20 weeks gestation. Must be verified by physician or documented by a physician (*may be on prenatal record*).  
- Hypertension (Chronic): patient has history of medically diagnosed hypertension prior to pregnancy.  
- Hypertension Associated with Pregnancy: patient has been medically diagnosed with hypertension during this pregnancy or has a diastolic greater than 90 on two occasions in a 24 hour period.  
- Violence during Pregnancy: the woman been a victim of violence during this pregnancy. |

HEALTHY BEGINNINGS FOLLOW-UP REFERRAL

All areas after question #79 are to be completed by the appropriate Health & Community Services employee. This section is used to initiate the Priority Assessment for Follow up.

- Record the date the referral was received.
- If other Health and Community Services are involved with the family as part of the circle of care, it can be noted here. Examples include: Mental Health, Addictions, Child Youth and Family Services.
- If a Global All Programs Search is initiated as per regional policy, additional follow up with other service providers may be indicated.
- Indicate if the child has been referred to the Perinatal High Risk Clinic (see Appendix A)
- Indicate if the child has been referred to Audiology for a family history of High Risk Deafness (see Appendix E)
- Note any other referrals for follow up at the Janeway (Child Development, Neuromotor, Craniofacial Clinic, Cardiology or other specialist)
- On the reverse side complete mother’s name, MCP#, Infant’s name and DOB. Identifying information must be on each page if form is copied, emailed or faxed.
- The Priority Assessment for Follow-up form on the reverse side may be initiated at the referral site, and completed by the Nurse receiving the referral (See Appendix F for a copy)
- Complete the Priority Score and indicate the degree of priority
- A Client Risk/Staff Safety Risk * Assessment may be completed as per regional policy
- See CRMS for Priority Assessment, progress notes and further documentation

The appendices in this guide that are used by Health & Community Services are:

APPENDIX A – Criteria for Provincial Perinatal Program
APPENDIX B – Procedure for Immediate Follow-up
APPENDIX C – Community Health Nursing Postnatal Follow-up Guide
APPENDIX D – Edinburgh Postnatal Depression Scale: Guide
APPENDIX E – High Risk Deafness Criteria
APPENDIX F – Priority Assessment for Follow-up
The high-risk follow up clinic is an integral component of Perinatal Program Newfoundland Labrador (PPNL). Clinic admission criteria targets newborns who may be at risk for developmental delay, cerebral palsy, and hearing and visual impairments. Infants at risk may be referred by a physician or nurse from any health care facility in NL that provides maternal/newborn services, or by any family physician or community health nurse.

The follow-up clinic assesses the children on a regular basis until age 3. They receive developmental, neurological, and physical assessments thereby enabling appropriate referral, if necessary, to such services as physiotherapy, speech-language therapy, audiology, ophthalmology and occupational therapy. Additional referrals are made to the Children’s Rehabilitation Program or the Child Development and Learning Program when required. This follow-up clinic does not replace the children’s family physician, pediatrician or community health nurse, but is a special service that complements their care by focusing on anticipatory and early intervention measures.

Thanks to the special effort of the Medical Advisory Committee, the admission criteria for the follow-up clinic has been newly revised. This revision occurred by monitoring the outcomes of babies who were assessed by our program since 1994, comparing our criteria with that of clinics in other provinces and incorporating findings from the literature and specialized physician experience and knowledge.

Please keep the enclosed revised criteria referral form in a visible place in your institution, as a reminder to refer high-risk newborns to our follow-up clinic.
Thank you so much for your attention to this matter. Please do not hesitate to contact our team with any questions or concerns, by calling 709.777.4656 or email ppnl@easternhealth.ca. For those facilities within Eastern Health, referral forms can be ordered through the intranet on Print TRAC using the form number on the bottom right hand side of the page. Outside of Eastern Health, please call or email the above number/address for us to mail you the referral forms.

Warm regards,

LORRAINE BURRAGE
Program Coordinator
Referral Form

Date: ________________________________

Please refer to ________________________________ (name) for follow-up in the High-Risk Clinic of the Perinatal Program.

The presence of one or more of the following criterion that occurred or was recognized in the first 28 days of life, (in the event of a multiple birth all babies are followed if one baby meets admission criteria):

☐ Birth weight less than or equal to 1600 grams or gestation less than or equal to 32 weeks
☐ Mechanical ventilation for 48 hours or more

Central Nervous System:
☐ Seizure confirmed by abnormal EEG, or as a result of metabolic etiology (such as hypoglycemia)
☐ Hypoxic Ischemic Encephalopathy (HIE)
☐ Stroke
☐ Meningitis/Encephalitis/Intrauterine virus infection, such as Cytomegalovirus (CMV)
☐ Hydrocephalus
☐ Intraventricular hemorrhage, grade 3 or greater
☐ Periventricular leukomalacia (PVL)

Complex Surgery:
☐ Thoracic
☐ Gastrointestinal (GI)
☐ Genital Urinary (GU)

Cardiac:
☐ Cyanotic Congenital Heart Disease
☐ Cardiac surgery requiring bypass less than 30 days of age
☐ Prolonged hypoglycemic greater than 3 episodes of blood glucose less than 2.6 mmol/L in a 24 hour period
☐ History of prenatal exposure to alcohol as a result of maternal alcohol intake characterized by substantial, regular intake or periodic binge drinking during pregnancy (Motherisk Program 2006)
☐ History of prenatal exposure to illicit substances, such as amphetamines (e.g., Adderall), cannabis, club drugs (e.g., ecstasy), stimulants (e.g. cocaine, Ritalin), opioids (e.g., heroin, Oxycodone, Percocet) and solvents, as a result of maternal habitual (regular) use during pregnancy
☐ Prenatal exposure to Methadone, as a result of maternal participation in a Methadone Maintenance Treatment (MMT) Program during pregnancy
☐ Physician request, specify: ________________________________

Name: ________________________________ Signature: ________________________________

Whitney Cady - Chart: Yellow Copy - Perinatal Program
APPENDIX B

PROCEDURE FOR IMMEDIATE FOLLOW-UP

IF IMMEDIATE FOLLOW-UP IS REQUIRED (WITHIN 48 HOURS), THE REFERRING NURSE IS REQUESTED TO TELEPHONE THE REQUEST TO COMMUNITY HEALTH NURSE.

♦ If infant remains in hospital following discharge of mother:
   Forward second referral at time of infant’s discharge with information on infant’s hospitalization and recommendations for follow-up.

♦ If mother remains in hospital following discharge of infant:
   Forward second referral at time of mother’s discharge with information on mother’s hospitalization and recommendations for follow-up.

♦ If infant is transferred:
   Include on mother’s referral as much information as possible regarding infant’s condition.

♦ If infant In Care/Adoption:
   Send infant referral to Community Health Nurse of receiving foster parents/adopted parents.

   Send mother’s referral to mother’s district Community Health Nurse.

♦ If, following discharge, the mother stays for more than one week in a community health nursing district other than her place of residence, send the Health & Community Services Nursing Referral to the district where mother is staying immediately following discharge.

NOTE that Part B has an area “Alternate/Temporary Address”; complete this section when the mother is not returning to her usual place of residence within a week after discharge.
APPENDIX C

HEALTHY BEGINNINGS FOLLOW-UP REFERRAL

I Priority Assessment

1. Perinatal High Risk

Compare the criteria from the Provincial Perinatal Program with the information on the Live Birth Notification form. **If the infant meets any one of the criteria, contact the Provincial Perinatal Program or make a referral.** Most infants who meet the high risk criteria will be identified by the Perinatal Program Nurse through referrals from the Janeway Neonatal Intensive Care Unit. See Appendix A for the Provincial Perinatal High Risk Follow-up Program Criteria.

2. High Risk Deafness

Compare the criteria from the High Risk Deafness Criteria with the information on the Live Birth Notification form. **If the infant meets any one of the criteria refer infant or confirm if prior referral has been made, for audiology assessment and follow-up.** See Appendix E for High Risk Deafness Criteria.

3. Priority Assessment for Follow-up

See Appendix F for detailed explanation and procedure for use of the Priority Assessment for Follow-up.

II Record of Parent Learning

- Review the Record of Parent Learning Form and the Live Birth Notification form and transfer areas of follow-up, e.g. learning needs identified but not taught, or areas taught that needs reinforcement or confidence building.

- Record newly identified learning needs.

- Implement the PPSP following the same procedure as outlined in the PPSP Implementation Plan.

- Provide parents with an additional copy of the PPSP booklet: *You and Your New Baby: Questions You May Have* if they do not have it at home.

- Use the questionnaire to assess parent learning during telephone, postnatal clinic and home visits.

- Parent Information Sheets are distributed by the nurse to reinforce teaching. They are not to be provided as a series of information sheets for parents.
• Although copies of the Parent Information Sheets may be available in both hospital and health units, some are more appropriate for distribution in one place than the other.

The comments section can be used to document any contact that does not identify a Nursing Diagnosis/Health Issue requiring a plan of action for follow-up. Follow the regional procedure for documentation on progress notes, problem list, etc. to chart plan of care and follow-up action.
APPENDIX D
EDINBURGH POSTNATAL DEPRESSION SCALE: GUIDE

Postnatal Depression

Research indicates that postnatal depression affects at least 10% of women and that many remain untreated. These mothers may cope with their baby and with household tasks, but their enjoyment of life is affected, and there may be long-term effects on the family.

Edinburgh Postnatal Depression Scale (EPDS)

This tool has been developed to assist primary care health professionals to detect mothers suffering from postnatal depression; a distressing disorder more prolonged than the “blues’ but less severe than postpartum psychosis. It consists of 10 short statements and can usually be completed within 5 minutes. Validation studies have shown that those scoring above a threshold of 12-13 were likely to be suffering from a depressive illness of varying severity.

Referral

Referral to the appropriate professional is indicated if the EPDS score is above 13. The nurse will discuss the results of the test with the client and encourage her to seek counseling either through her family physician, obstetrician or mental health professional.

Source:

Instructions

1. The client is asked to underline the response which comes closest to how she has been feeling in the previous 7 days.

2. All 10 items must be completed.

3. The client should complete the scale herself, unless she has limited reading or language skills.

4. Care should be taken to avoid the possibility of the client discussing her answers with others.

Scoring

Question 1, 2 and 4 are scored 0, 1, 2 and 3 according to increased severity of the symptoms.

Questions 3, 5, 6, 7, 8, 9 and 10 (those with asterisk) are reverse scored 3, 2, 1 and 0.
Edinburgh Postnatal Depression Scale: Guide (Appendix D)

Note: The questions in this document have the number score at the end of each option. This is provided for nurses’ information only and should never be used if the woman herself completes the form. In that case, a blank form should be used.

The total score is calculated by adding scores for each of the 10 items.

A score of 12-13 or above may reflect a depressive illness of varying severity.

In doubtful cases, the EPDS may be repeated in 2 weeks.

The EPDS score should not override clinical judgment. A careful clinical assessment should be carried out to confirm the diagnosis. A score just below the cut-off should not be taken to indicate absence of depression, especially if the nurse has other reasons to consider this diagnosis. The scale will not detect mothers with anxiety neurosis, phobias or personality disorders.

Name: ____________________________________________

Address: __________________________________________

Baby’s Age: _________________________________________

As you have recently had a baby, we would like to know how you are feeling. Please UNDERLINE the answer which comes closest to how you have felt IN THE PAST 7 DAYS, not just how you feel today.

Here is an example already completed:

I have felt happy:
   Yes, all the time
   Yes, most of the time
   No, not very often
   No, not at all

This would mean: “I have felt happy most of the time” during the past week. Please complete the other questions in the same way.
Edinburgh Postnatal Depression Scale (Appendix D)

In the past 7 days:

Score

1. I have been able to laugh and see the funny side of things
   
   As much as I always could (0)
   Not quite so much now (1)
   Definitely not so much now (2)
   Not at all (3)

2. I have looked forward with enjoyment to things
   
   As much as I ever did (0)
   Rather less than I used to (1)
   Definitely less than I used to (2)
   Hardly at all (3)

*3. I have blamed myself unnecessarily when things went wrong
   
   Yes, most of the time (3)
   Yes, some of the time (2)
   Not very often (1)
   No, never (0)

4. I have been anxious or worried for no good reason
   
   No, not at all (0)
   Hardly ever (1)
   Yes, sometimes (2)
   Yes, very often (3)

*5 I have felt scared or panicky for no very good reason
   
   Yes, quite a lot (3)
   Yes, sometimes (2)
   No, not much (1)
   No, not at all (0)

*6. Things have been getting on top of me
   
   Yes, most of the time I haven’t been able to cope at all (3)
   Yes, sometimes I haven’t been coping as well as usual (2)
   No, most of the time I have coped quite well (1)
   No, I have been coping as well as ever (0)
Edinburgh Postnatal Depression Scale: Guide (Appendix D)

In the past 7 days:

Score

*7. I have been so unhappy that I have had difficulty sleeping
   Yes, most of the time (3)
   Yes, sometimes (2)
   Not very often (1)
   No, not at all (0)

   ____

*8. I have felt sad or miserable

   Yes, most of the time (3)
   Yes, quite often (2)
   Not very often (1)
   No, not at all (0)

   ____

*9. I have been so unhappy that I have been crying

   Yes, most of the time (3)
   Yes, quite often (2)
   Only occasionally (1)
   No, never (0)

   ____

*10. The thought of harming myself has occurred to me

   Yes, quite often (3)
   Sometimes (2)
   Hardly ever (1)
   Never (0)

APPENDIX E

HIGH RISK DEAFNESS CRITERIA

Indicators for Sensorineural and/or Conductive Hearing Loss

A. For use with neonates, birth through age 28 days, when universal screening is not available.

1. Family history of hereditary childhood sensorineural hearing loss. (Includes parents, grandparents, siblings, aunts, uncles and first cousins of the child).

2. In-utero infection such as cytomegalovirus, rubella, syphilis, herpes and toxoplasmosis.

3. Craniofacial anomalies, including those with morphologic abnormalities of the pinna and ear canal, absent or abnormal philtrum, low hairline, etcetera.

4. Birth weight less than 1500 grams (3.3 lbs.).

5. Hyperbilirubinemia at a serum level requiring exchange transfusion.

6. Ototoxic medications (to the baby (> 5 days) or breastfeeding mother), including but not limited to, the amino glycosides, e.g., gentamicin, tobramycin, kanamycin, streptomycin, used in multiple courses, or in combination with loop diuretics and some combination chemotherapy regimens.

7. Bacterial meningitis.

8. APGAR scores of 0-4 at 1 minute or 0-6 at 5 minutes.

9. Mechanical ventilation lasting 5 days or longer.

10. Stigmata or other findings associated with a syndrome known to include sensorineural and/or conductive hearing loss (e.g., Waardenburg, Usher’s or Down Syndrome).

B. For use with infants, age 29 days to 2 years, when certain health conditions develop that require rescreening.

1. Parent/caregiver concern regarding hearing, speech, language and/or developmental delay.

2. Bacterial meningitis and other infections associated with sensorineural hearing loss.

3. Head trauma associated with loss of consciousness or skull fracture.
High Risk Deafness Criteria (Appendix E)

4. Stigmata or other findings associated with syndromes known to include sensorineural and/or conductive hearing loss (e.g., Waardenburg, Usher’s or Down Syndrome).

5. Ototoxic medications, including but not limited to, chemotherapeutic agents or amino glycosides used in multiple courses or in combination with loop diuretics.

6. Recurrent or persistent otitis media with effusion for at least three months.

C. For use with infants age 29 days through 3 years who require periodic monitoring of hearing.

Some newborns and infants may pass initial hearing screening but require periodic monitoring of hearing to detect delayed onset sensorineural and/or conductive hearing loss. Infants with these indicators require hearing evaluation at least every six months until age three years and at appropriate intervals thereafter.

Indicators associated with delayed onset sensorineural hearing loss include:

1. Family history of hereditary childhood hearing loss.

2. In-utero infection, such as, cytomegalovirus, rubella, syphilis, herpes or toxoplasmosis.

3. Neurofibromatosis Type II and neurodegenerative disorders.

Indicators associated with conductive hearing loss include:

1. Recurrent or persistent otitis media with effusion.

2. Anatomic deformities and other disorders that affect Eustachian tube function.

3. Neurodegenerative disorders.
APPENDIX F

PRIORITY ASSESSMENT FOR FOLLOW-UP

Purpose:
A mechanism to:

a) Provide standardized screening of all parturient women.

b) Identify infants and children up to the age of 5 years with potential for:
   • physical or emotional stressors secondary to known health challenge(s)
   • developmental delays
   • difficulties resulting from family interaction/social factors

c) Collect data to evaluate portions of the Healthy Beginnings Program.

Target Populations:

• All newborns who will reside in the province of Newfoundland and Labrador.

• Any infant or child up to age 5 years where the PHN observes or receives additional information indicating that she/he may be eligible for the program.

Procedure:

• Priority Assessment for Follow-up is to be initiated within 48 hours of receipt of Postnatal Referral.

• The Priority Assessment for Follow-up form can also be used for any infant or child beyond the newborn period when the PHN observes or receives additional information indicating that a child may fit the eligibility criteria for the Healthy Beginnings Program. Use the Priority Assessment Form in this situation, writing the parents/guardians surname and given name, date, address, and phone number and child’s MCP number in the upper right-hand corner.

If a condition or situation exists, circle the corresponding score at the right side of the form. Where more than one choice is provided, please circle the specific item pertaining to the situation being assessed. Then total the circled score(s) and enter the number of the Total Priority Score Box at the bottom. The nurse completing the assessment signs in the bottom right-hand corner noting date. The Scoring may also be completed in CRMS.
Priority Assessment for Follow-up (Appendix F)

Explanation of Items:

A. Child with Known Disability

1. Congenital
   a) Major (probability of permanent disability), e.g. Down Syndrome.
   b) Moderate (correction may be possible), e.g. cleft palate.

2. Acquired
   a) Major disability, acquired during the first five years of life, with probability of permanent disability, e.g., Cerebral Palsy, severe head injury.
   b) Moderate disability, acquired during the first five years of life, with correction possible, e.g. loss of limb.

B. Developmental Priority Factors

3. Low Birth Weight
   a) 0-1499 grams
   b) 1400-1999 grams
   c) 2000-2499 grams

4. Bilirubin Level
   Note if bilirubin was ever/is over 20 gm or 342 umol/L (or exchange level if premature)

5. Complications of Pregnancy
   a) Infections that can be transmitted in utero:
      Includes: Infections that can be transmitted in utero and may damage the fetus (e.g., rubella in the first 3-4 months, AIDS, cytomegalovirus, congenital herpes).
      Excludes: Hepatitis B where the mother is a carrier and where the child has received prophylaxis according to provincial guidelines, Herpes, unless the child acquires the illness during delivery.
   b) Drugs that were abused during pregnancy:
      Includes: Alcohol, street drugs, any drugs that have a known teratogenic effects on baby. May also include if mother has a known addiction diagnosis
      Excludes: Non-teratogenic prescription drugs, small amounts of over-the-counter drugs, cigarette use (See 17, “Other” if this is a particular factor).
Priority Assessment for Follow-up (Appendix F)

6. Complications of Labor and Delivery
   a) Labour requiring mid forceps including breech delivery with forceps.
   b) Infant trauma or illness, e.g., seizures, respiratory distress syndrome. Applies to infants in the first 28 days of life or until discharge where an infant has been continuously hospitalized beyond the neonatal period.
   c) APGAR: APGAR at 5 minutes only if less than 7. If the Apgar score is less than 7 at 5 minutes, the point value is calculated by deducting the APGAR score from 10. E.g., if APGAR at 5 minutes is 5, the score is 10-5 = 5 points.

7. Family history (up to level of second cousins) of a disability not detectable at birth that could affect development, e.g., hearing loss, developmental delay in a family member.

8. Developmental concerns not already covered in any category above.
   a) Acquired potential for developmental delay due to illness or trauma in the first five years, i.e. child developed complications from meningitis at age 2.
   b) Delayed developmental assessment in first five years. This category is used when the developmental delay is confirmed by diagnosis, not after screening when it is only suspected. If the delay is such that the nurse in her professional judgment and after consultation with her supervisor sees no need for Community Health Nursing follow-up, i.e. in the event of a language delay with no other factors present and the child is receiving service form a speech pathologist, the child need not be admitted to or continued with the priority program.

C. Family Interaction Priority Factors

9. Age of Mother:
   a) 15 years or under
   b) 16 years or 17 years
   c) 18 years or 19 years

10. Social Situation
    a) Father of infant not resident but other support available. Consider family, friends, church, and community resources.
    b) Father not resident and no support.
    c) Father resident and supportive but no other social support; or severe isolation by language or geography. Items (a), (b), and (c) would also apply if the mother was not a resident during the infant period (one-year) but the father was. When a child is seen in a single parent home after one year of age, the situation should be individually assessed to determine if this social situation is having an adverse effect on the child.

Support includes family, friends, community, and spiritual. It is important to assess support as it relates to culture, geography, and language as well as the client’s perception of the support available.
Priority Assessment for Follow-up (Appendix F)

11. Receiving Financial Assistance or Having Financial Difficulties
This category includes those clients who are receiving income support or other financial benefits (e.g. drug card) as well as those having insufficient finances to meet basic needs after meeting financial commitments.

12. No Prenatal Care Before Six Months
If mother did not receive prenatal care from a qualified medical/health care practitioner during the first two trimesters, this should be noted.

13. Mental Illness or Developmental Delay in Mother or Father
   a) Schizophrenic or Bipolar affective disorder (a close family history of psychiatric illness should be noted)
   b) Mother has a postpartum psychosis or postpartum depression or
   c) Developmental delay of either parent

   *Double score if both parents are positive in (a) or (c).

14. Prolonged Postpartum Maternal Separation
   If separated over 5 days, note:
   a) If frequent infant contacts (phone or visits as feasible)
   b) Little or no contact

   Consider location, geography, ability to call, mother’s illness.

15. Assessed Lack of Bonding, e.g., minimal eye contact, touching, etc.
   Consider eye contact, touching, handling of infant, discussion of child, disappointment in sex. Note if unrealistic expectation of the infant, negative comments about mothering abilities and a high level of anxiety.

16. Three+ Hospitalizations in a Year, in the first two years of life, in the Absence of Known Disability of Chronic Illness.

17. Other
   Nursing assessment and judgment will be used to assign a score between 0 and 9 for other priority items. The reason for the score is to be specified on the line provided on the Priority Assessment for Follow-Up Form. If space is inadequate, give detailed information in the notes section in CRMS. The reasons may include, but not be limited to the following:

   Child Factors:
   • failure to thrive
   • behavioral problems
   • diagnosed mental health problem
   • Including ADD and ADHD
Parental Factors:
- parenting difficulties
- first time parenthood (specify age of parents)
- low literacy level/low educational

Family Factors:
- major chronic illness in family
- marital difficulties
- family violence

18. Scoring
Total Score: Total the score(s) and enter the number in the “Total Score” box at the bottom.

<table>

<tr>
<td>Medium Priority</td>
<td>5-8</td>
</tr>
<tr>
<td>Low Priority</td>
<td>3-4</td>
</tr>
<tr>
<td>Minimal Priority</td>
<td>0-2</td>
</tr>
</tbody>
</table>

Incomplete Score:
It may not always be possible to obtain all assessment data required to give a final score prior to contact with the family.

When information is missing and the available data does not already indicate a moderate or high priority rating, the nurse will:
- make a telephone visit to determine the appropriate priority rating; or
- failing this, make a home visit to assess

When all information is gathered the “total score” will be completed.
### APPENDIX G

LIST OF TABLES USED THROUGHOUT #1 TO #79

</table>

---

**Note:** The form contains various fields for personal and medical information, including birth details, health history, and delivery specifics, formatted in a table-like structure.

---

**Image Reference:** The form is a live birth notification form used in Newfoundland and Labrador to record new births, with fields for personal identifiers, medical history, and delivery details.
HOSPITAL NURSING DISCHARGE SUMMARY

58. Infant Weight:
   Birth ____________
   Discharge ____________
59. Head Circumference: ____________
60. Length at Birth: ____________
64. Congenital Anomalies:
   Confirmed by Discharge
   □ Yes  □ No
   Type ________________________________
61. Infant Feeding:
   □ Exclusive breastfeeding/ breast milk only
   □ Any breastfeeding plus supplement (G/W, formula or other breast milk substitute)
   □ No breastfeeding
62. Previous Breast Feeding:
   □ Yes  duration (weeks) ____________
   □ No  □ Unknown
65. Neonatal Screening:
   □ Yes  □ No
   If yes: specify ________________
66. Familial Conditions:
   □ Yes  □ No
67. Newborn Hearing Screening done:
   □ Yes  □ No
68. Mother’s Condition on D/C:
   □ Incision □ Suture/Staples □ Tubal Ligation
   B/P _________  Hgb _________  Bld Group _________
   Rhogam: □ Yes  □ No  Date Given ________________
   Rubella status: □ Immune □ Non-immune
   MMR given: □ Yes  □ No  Date Given ________________
69. Post Delivery LOS ________________
70. Has the mother taken immunosuppressive therapy?
   □ Yes  □ No
71. Did she discuss live vaccine administration for this baby with her doctor?
   □ Yes  □ No
72. Prenatal Education and Support Received?
   □ Yes  □ No
73. CHN Contact in Hospital  □ Yes  □ No
74. Follow up Recommendations (include incision care, follow up for blood work and other medical orders on discharge if needed)

PRIORITY ASSESSMENT FOR FOLLOW-UP

CIRCLE IF YES

NYA = place x in Box
### A CHILDREN WITH KNOWN DISABILITY

1. **Congenital anomaly**
   - a) Major (probability of permanent disability) 9 □
     - e.g. Down Syndrome, Spina Bifida etc.
   - b) Moderate (correction may be possible) 6 □
     - e.g. Cleft palate

2. **Major disability** acquired during first 5 years of life (probability of permanent disability)
   - e.g. Cerebral Palsy, severe head injury 9 □
   - b) Moderate disability acquired during first 5 years (correction may be possible)
     - e.g. loss of limb 6 □

### B DEVELOPMENTAL FACTORS

3. **Low birth weight**
   - a) 1-1499 gm 9 □
   - b) 1500-1999 gm 8 □
   - c) 2000-2499 gm 6 □

4. **Bilirubin** level over 20 gm or 342 umol/L (or exchange level if premature) 8 □

5. **Complications of pregnancy**
   - a) Infections that can be transmitted in utero and may damage the fetus (e.g. rubella) 9 □
   - b) Drugs, e.g. alcohol abuse diagnosed in mother 9 □

6. **Complications of labour and delivery**
   - a) Labour requiring mid forceps including Breech Delivery with forceps 4 □
   - b) Infant trauma or illness (e.g. seizures Respiratory Distress Syndrome) 6 □
   - c) Apgar at 5 minutes only if less than 7, Deduct score at 5 minutes from 10 points

7. **Family history of a disability not detectable**
   - at birth that could affect development e.g. Hearing loss, developmental delay 4 □

8. **Development concerns not already covered in any above category**
   - a) acquired risk of developmental delay due to an illness or trauma in the first 5 years 6 □
   - b) Delayed developmental assessment in first 5 years 9 □

### C. FAMILY INTERACTION FACTORS

9. **Age of Mother**
   - a) 15 and Under 9 □
   - b) 16 or 17 8 □
   - c) 18 or 19 5 □

10. **Social Situation**
    - a) father of infant not resident but other support available 2 □
    - b) father not resident and no support 7 □
    - c) father resident and supportive but no other social support or severe isolation by language or geography 4 □

11. **On social assistance or financial difficulties** 3 □

12. **No prenatal care before sixth month** 4 □

13. **Mental Illness or developmental delay in mother and/ or father**
    - a) Schizophrenia or bipolar affective disorder 7 □
    - b) Postpartum depression 9 □
    - c) Developmental delay of a parent 6 □

14. **Prolonged postpartum maternal separation** (5 days or more):
    - a) With frequent infant contacts (visits or phone as feasible) 2 □
    - b) Little or no contact 6 □

15. **Assessed lack of bonding**
    - (e.g.: minimal eye contact or touching) 6 □

16. **> 3 hospitalizations in 1 year** in absence of known chronic illness or condition 7 □

17. **Other** e.g.: marital distress, low education status, failure to thrive, difficulty raising an older child, etc. (Score 0 to 9) ___

Specify reason: ____________________________

### PRIORITY SCORE:

Total Priority Score: _______

- 9 and over – HIGH Priority
- 5 to 8 – Moderate Priority
- 3 to 4 – Low Priority
- 0 to 2 – Minimal Priority

Date: MM _____ DD _____ YY ___

Nurse’s Signature: ____________________________
COMMENTS

All comments and questions concerning the Live Birth Notification form and the Reference Manual are welcome. All suggestions will be considered for the next revision.

Please do not mail comments with the Live Birth Notification form.
