

## Coming Soon!

Clinical Documents and Medical Imaging Reports from Central Health, Western Health, and Labrador Grenfell Health are coming in Winter 2018!

Laboratory Reports and Encounters from Labrador Grenfell Health will go live early Winter 2018.

*Improved Health Through Quality Information*

## Time Zone and Labrador Health Encounters

### New Update - December 2017

Effective midnight Sunday December 10, 2017, the Date and **Time Zone** will be displayed on the header of each Clinical Document, Laboratory and Medical Imaging report.

You will see NDT (Newfoundland Daylight Saving Time) or NST (Newfoundland Standard Time) next to the time displayed in the header of the report.

**Labrador Health encounters** have been added to the encounters tab. But the visit history will not be available for viewing until winter 2018.

## Medication Profile

All 203 community pharmacies are now connected to the Pharmacy Network. This means more comprehensive medication profiles for patients in HEALTHe NL!

Please note when completing your medication reconciliation, ensure "Active" and "Completed" statuses are selected. Completed status means the patient may or may not have finished their prescribed medication. For further information please refer to the HEALTHe NL Help Files page 90. **(New Update December 20, 2017)**

Medication dosage form/route is now available under the prescription summary. **(Updated November 20, 2017)**

## CDV Tree Sorting, Grouping and Searching

You can now filter by Years and Hours when filtering patient's reports from the Clinical Document View (CDV Tree). Each item has its own dropdown list that appears when selected. The following options are available:

- Hours: 1-24 hrs
- Days: 1-31 days
- Weeks: 1-24 weeks
- Months: 1-24 months
- Years: 1-30 years

To use the filter functionality, go to the Patient Summary and under the CDV Tree click the  icon. On the **Show** field click in the dropdown list and select "**Last**". By default the first option to appear is "Hours". Click in the dropdown next to Hours to change it to Days, Weeks, Months or Years. Above each selection appears a field where you can select the specific timeframe (i.e. if you select "Hours" you can pick between 1 to 24 hours). **(Updated July 10, 2017)**

Important Note: Limitations remain for sorting or grouping by Author in the CDV tree. Pending resolution we discourage sorting or grouping the CDV tree by **Author** at this time.

HEALTHe NL currently includes the following types of information:

- Patient medication histories from connected community pharmacies. We now have 100% of community pharmacies province wide connected.
- Eastern Health Meditech data, including dictated reports, laboratory results, diagnostic imaging and encounters (since April 2015).
- Provincial immunization data from a 2003 year of birth onward.
- Central (since September 2016) and Western (since June 2017) Health laboratory results and encounters.

## We love hearing from you!

Family physician Dr. Roy Chaulk is one of HEALTHe NL's biggest champions. [Click here](#) to see what he has to say about how he has integrated HEALTHe NL into his daily workflow.
